**DETAILED ACTION**

***Election/Restriction***

1. Restriction to one of the following inventions of Groups I, II and III is required under 35 U.S.C. 121:

- I. Claims 12-22, drawn to a semiconductor device, classified in class 257, subclass 774
- II. Claims 6-11 and 23-30, drawn to a method of making a semiconductor device, classified in class 438, subclass 629
- III. Claims 1-5, drawn to a composition of semiconductor device layer. classified in class 428, subclass 366

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of Group I invention would not necessarily imply unpatentability of the process of the group II invention, since the device of group I invention could be made by the processes different from those of group II invention. For example, forming the silicon oxycarbide by sputtering or plasma deposition instead of vapor deposition.

Art Unit: 2811

3. Because these inventions of the groups I-III are distinct and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
